

Commitment to Change Workgroup Member Survey

Survey Instructions

The purpose of this survey is to receive input from CTC Workgroup members on the full scope of ideas that were raised at CTC Workgroup meetings, as well as through constituent surveys, calls and emails to committee staff, and staff outreach to interested groups at external meetings, such as Peerpocalypse 2023 and a tribal gathering.

Keep in mind that some ideas were raised by multiple people, while others may have been raised by a single person. Some ideas may be the result of significant thought while others were offered during unfiltered brainstorming. Some are general or vague, while others are more specific. Some include multiple ideas in one. Some are expressions of values rather than specific actions. All ideas are presented in support of the workgroup's goals to be transparent and inclusive of all voices that provided input to the workgroup.

The ideas in this survey are worded with the objective to convey the intent of the speakers to the best of the survey drafters' abilities, and they have been edited solely to improve clarity.

Consider this survey as a starting point and a tool to begin filtering the ideas that will be discussed further, shaped, and included in the workgroup report as either recommendations or summarized discussions.

The survey consists of 46 sections with a total of 246 ideas. You will be able to return to your survey and add or modify responses until the survey deadline. Consider using a printed version of the survey to plan your answers and then entering them in Survey Monkey all at once.

If you need assistance completing this survey, please contact Candace Joyner (candace.n.joyner@ojd.state.or.us) and Laura Cohen (laura.e.cohen@ojd.state.or.us).

Commitment to Change Workgroup Member Survey

Comments

As noted in the introduction to this survey, this survey is intended to serve as the first opportunity for the CTC Workgroup to review the plethora of ideas to improve the civil commitment system that were introduced at workgroup meetings, in constituent surveys, and other communications to workgroup staff. In the interest of respecting the time of workgroup members to complete the survey, the survey did not include the option to comment on individual ideas. The workgroup will have an opportunity to comment on individual ideas following tabulation of the survey results. However, this section allows members with a strong interest in commenting before that time to do so here.

245. Use this space to provide comments on particular ideas presented in the survey. Please identify the idea by Section Title and question number.

246. Use this space to add additional ideas for improving Oregon's civil commitment system that are not included in this survey. Identify the subject area that most closely matches a Section Title in this survey or note if it does not fit into an existing category. **Keep in mind that the scope of this workgroup begins at the point when the civil commitment is initiated and does not include focus on needed changes to the behavioral health care system before reaching that point.**
